

CAREER OBJECTIVE:

Software Engineer with 4+ years of experience building production backend, full-stack, SaaS, real-time, and AI-integrated applications using Node.js, TypeScript, Python, React/Next.js, PostgreSQL, and cloud technologies. Strong background in REST APIs, microservices, authentication and authorization, WebSockets, payment integrations, AWS/serverless systems, Generative AI, Voice AI, and LLM/API integrations. Seeking a backend or AI engineering role in Saudi Arabia or the UAE.

PROFESSIONAL EXPERIENCES:

Backend / Voice AI Engineer:

Jul 2025 – Aug 2026

Intakely AI (Remote)

Intakely AI builds real-time voice AI intake and scheduling automation for live phone conversations, including legal intake workflows.

Responsibilities:

- Engineered a real-time voice intake platform for live phone conversations with sub-second response requirements.
- Built Python backend services for bidirectional audio streaming using WebSockets and Twilio Media Streams.
- Integrated STT/TTS pipelines (Whisper, Cartesia), interruption handling, and multi-tenant workflows for responsive voice interactions.
- Integrated external scheduling services for automated appointment booking and intake workflows.

Achievements:

- Delivered a live voice agent that handles real phone calls with sub-second response targets.
- Designed multi-tenant workflows so multiple clients can run on a single platform.

Software Engineer:

Sep 2024 – Jun 2025

SOFTOO TECHNOLOGIES Pvt. Ltd – Islamabad, Pakistan

Softoo Technologies is a software company with offices in Islamabad, Pakistan and the United Kingdom.

Responsibilities:

- Developed and maintained production SaaS backend services using Node.js and TypeScript.
- Designed REST APIs, microservices, and serverless components supporting core business workflows.
- Built cloud-based backend components using AWS services including Lambda, API Gateway, and DynamoDB.
- Optimized data-access patterns for improved performance and reliability.

Achievements:

- Delivered serverless AWS backend components supporting core business workflows in production.
- Improved performance and reliability of data access in production SaaS services.

Software Engineer (Node):

Aug 2022 – Aug 2024

HiveWorx Private Limited – Islamabad, Pakistan

HiveWorx is a software company based in Islamabad, Pakistan, building enterprise applications.

Responsibilities:

- Built enterprise backend systems using Node.js, Express.js, NestJS, PostgreSQL, and TypeORM.
- Implemented OAuth2, JWT authentication, RBAC, and secure authorization workflows.
- Built real-time notification systems using WebSockets and automated background processes.

Achievements:

- Led development of a centralized User Management and SSO platform shared across multiple enterprise applications.
- Formally recommended by the company in the experience letter for future positions.

KEY ENGINEERING & AI PROJECTS:

- **Real-Time Voice Intake Platform:** Multi-tenant voice automation platform for live legal intake and automated appointment scheduling with sub-second latency and automated call routing.
Tech Stack: Python, WebSockets, Twilio Media Streams, Whisper STT, Cartesia TTS, Supabase, Docker.
- **Virtual Hospital System (Saudi Client):** Comprehensive healthcare platform facilitating secure physician-patient communication, appointment scheduling, electronic records, and real-time virtual consultations.
Tech Stack: Node.js, NestJS, PostgreSQL, WebSockets, Redis, WebRTC, AWS.
- **Esports Event Management Platform:** Full-stack tournament platform handling tournament brackets, player profiles, squad rosters, payment gateway integrations, registrations, and live scoring.
Tech Stack: Next.js, React, Node.js, Express, PostgreSQL, TailwindCSS.

EDUCATIONAL CREDENTIALS:

DEGREE / CERTIFICATION	UNIVERSITY / INSTITUTE	YEAR OF PASSING
BS Information Technology (CGPA 3.28 / 4.00)	Government College University Faisalabad	2019
Certificate in Block Chain Programming (Grade A)	NAVTTTC / Air University, Islamabad	2022
Intermediate (FSc Pre-Engineering)	Government Degree College Lathianwala	2014
Matriculation (Science)	Government Higher Secondary School Khurrianwala	2012

PROFESSIONAL & TECHNICAL SKILLS:

Backend: Node.js, Express.js, NestJS	Languages: TypeScript, JavaScript, Python	Frameworks: FastAPI, Python AsyncIO
Frontend: React.js, Next.js, HTML5/CSS3	Architecture: REST APIs, Microservices, Event-Driven	Real-Time: WebSockets, Twilio Media Streams
Databases: PostgreSQL, MySQL, Supabase	NoSQL: MongoDB, DynamoDB, Redis	DevOps / Tools: Docker, Git, GitHub, Jira, Postman
Cloud / AWS: AWS Lambda, API Gateway, S3, Cognito	Security: OAuth2, JWT, RBAC, SSO	Testing / Docs: Swagger / OpenAPI, Jest, Unit Testing
AI Engineering: Generative AI, AI Agents, LLM APIs	Voice AI: STT / TTS (Whisper, Cartesia)	Integrations: Third-party APIs, Webhooks, Payments

LANGUAGES:

English: Professional Proficiency (Working / Technical)	Urdu: Native / Bilingual
---	--------------------------

CURRICULAR ACTIVITIES:

Cricket	Fishing	Badminton
---------	---------	-----------
